

Purpose

The purpose of an About Us page is to inform a visitor to your site about the identity of either you and/or your business. It doesn't always have to tell the whole story, but it should at least provide people with an idea of who and what you are and some personal information that people can relate to such as; education, family, etc. There are some common fixtures on this page but as visitors discover your brand, they need to distinguish what sets you and your business apart and what makes you... you.
